04:40 pm – 05:40 pm

Special Session: Streamlining Digital Payments for India Consumer

The honourable Prime Minister has envisioned India becoming a trillion dollar digital economy by 2025. Digital payments are a key element & crucial enabler of this goal. The Ministry of Electronics & IT stated that a total of 7,422 cr digital payment transactions were recorded in 2021-22, up from 5,554 cr transactions seen in 2020-21. The value of digital payments in India will grow three-fold to touch USD 1 trillion in the next four years, as per CLSA estimates. The opportunity is immense, as is the responsibility - to make digital payments safe, secure & seamless for Indian consumer. How do we ensure consumer interest remains paramount when conceptualizing the future of digital payments in India? What should regulations for card-based digital payments look like, and what roles do different players in the ecosystem play in keeping consumer interest protected at all times without the payments flow facing a breakdown? How do we amplify the UPI opportunity & make it more efficient? just the few questions this panel propose to explore.

Session Moderator: Shri Amol Kulkarni, Director, CUTS International
